Cyber**Aware** ™

CyberAware is a security awareness campaign development service that disseminates importance of information security across organization through different mediums.

Information is the lifeline of any business. The impact of this information falling in wrong hands could be catastrophic. It is for this reason organizations put a lot of technology and process based controls. While organizations spend more than 70% of their security budgets on technology, threats are still at large.

With employees being at the epicenter of the threat vectors, the employees need to be aware of the cyber security.

CyberAware is a security awareness campaign development service to disseminate importance of information security amongst employees to reduce risks by changing user behaviors through security awareness.

Through CyberAware, we help organizations to develop a complete quarterly or yearly plan for security awareness. This includes development of newsletters, posters, flyers, screen savers, emailers etc. The content is customized based on the organization and industry needs.

Key Benefits:
- Helps organizations to reinforce the message for information security.
- Measurable KPI's for the entire campaign.
- Customized content based on your organization needs.

Newsletters	Screensavers	Flyers
Roll up Standees	Security Advisories	Emailers
